

Project Proposal

Crystal Mountain

1. PROJECT SUMMARY

This proposal outlines the scope, hardware, subscription services, and associated costs for deploying the YULLR platform at **Crystal Mountain**, located at **Crystal Mountain Dr, Crystal Mountain, MI 49683, USA**.

Built for demanding alpine environments, the YULLR system is designed to operate reliably in sub-zero temperatures, high winds, and heavy snowfall. Each camera is remotely managed through the YULLR cloud platform, providing real-time monitoring, firmware updates, and centralized footage management with minimal on-site maintenance.

2. TRAILS

The following trails have been identified for YULLR Capture Points. Capture Point quantities and positioning are subject to adjustment based on site conditions.

Trail Name	Capture Points	Notes	Unit Price	Total
Cheers to Lou	3	—	\$1,000.00	\$3,000.00
Buck	3	—	\$1,000.00	\$3,000.00
Trail Capture Points Total				\$6,000.00

3. INSTALLATION NOTES

Installation will be carried out by a YULLR technician or approved installation partner. The following conditions apply:

- Installation is estimated to take **1 day** to complete.
- All installations will be scheduled and coordinated with designated on mountain contact.
- Each Capture Point will be mounted, aligned, and tested on-site before sign-off.
- YULLR will provide full system commissioning and staff orientation prior to the start of the season.

4. SITE REQUIREMENTS

The following requirements must be in place at each designated location prior to the installation date. Unless otherwise agreed in writing.

Location	Requirement	Details	Responsibility
Finish Shack	Power / Network	120V AC & broadband connection	Client

5. YULLR SUBSCRIPTIONS

Skiers and riders at Crystal Mountain can purchase YULLR subscriptions to receive their footage. The following subscription

types are available at published rates:

Day Pass

\$20

1 Mountain · 1 Day

Access to all YULLR footage captured at Crystal Mountain for a single visit day.
